Table of Contents

Unit	Title	Page
	Schematic Chart	VII
	Introduction	IX
	Unit 1: Introduction to Anatomy of Farm Animals	1
	Reading 1: Introduction to Anatomy of Farm Animals	3
	Reading 2: Anatomy of the Nervous System	11
	Unit 2: Bovine Mastitis: Global Concern in Dairy Production	17
	Reading 1: Bovine Mastitis: Global Concern in Dairy Production	18
	Reading 2: Mastitis Management in Dairy Animals	28
	Unit 3: Pharmacokinetics	33
	Reading 1: Pharmacokinetics	35
	Reading 2: Antibiotics	43
	Unit 4: Animal Reproduction	48
	Reading 1: Animal Reproduction	49
	Reading 2: Fertilization	57
	Unit 5: Nutrition and Food Processing	61

Reading 1: Nutrition and Food Processing	63
Reading 2: Mineral and Vitamin Nutrition in Ruminants	71
Unit 6: Vaccine Definition and Its Benefits	76
Reading 1: Vaccine Definition and Its Benefits	78
Reading 2: Types of Vaccines	87
Unit 7: Neoplasia and Neoplasm	91
Reading 1: Neoplasia & Neoplasm	92
Reading 2: General Features of Leukemia	100
Unit 8: Food Protection with Chemicals	105
Reading 1: Food Protection with Chemicals	106
Reading 2: Freezing of Foods and Freezing Effects	116
Unit 9: Zoonoses	120
Reading 1: Zoonoses	121
Reading 2: Classification and Factors Influencing Prevalence of Zoonoses	130
Unit 10: An Overview of Calf Diarrhea	134
Reading 1: An Overview of Calf Diarrhea	135
Reading 2: Prevention and Control of Calf Diarrhea	143
Unit 11: Measures of Health	148
Reading 1: Measures of Health	149
Reading 2: Sampling	157
Unit 12: DNA and RNA Extraction: The Past and the Present	162

Reading 1: DNA and RNA Extraction: The Past and the Present	164
Reading 2: PCR and PCR-based Methodologies	172
Unit 13: Veterinary Hematology: Sample Collection and Processing	176
Reading 1: Veterinary Hematology: Sample Collection and Processing	177
Reading 2: Erythrocyte Morphology and Structure	184
Unit 14: Sutures and Suturing Techniques in Skin Closure	190
Reading 1: Sutures and Suturing Techniques in Skin Closure	192
Reading 2: Anesthesia and Perioperative Care in Cats	200
References	205

Introduction

English for the Students of Veterinary Medicine is designed as an English for Academic Purposes (EAP) textbook for undergraduate university students of veterinary medicine, ranging from pre-intermediate to upper-intermediate levels of English proficiency. The book aims to help students consolidate general reading skills and strategies they have already acquired through general English courses and transfer these skills and strategies to their target academic tasks. Hence, a wide range of veterinary text types/genres have been included in the book to provide students with ample opportunities to learn and practice discipline-based reading skills. With the main focus on reading, the other language skills and components (i.e., vocabulary, grammar, discourse, and genre) are used as a springboard for fostering the reading skills and strategies.

The book consists of 14 units based on veterinary themes and topics of maximum authenticity and relevance to the students of veterinary medicine. The centerpiece of each unit is two reading passages developing the same theme with all activities of each unit geared towards that theme. To this end, there is an efficient integration of relevant content and language with a good distribution of common genres in the field of veterinary medicine.

The units are divided into various sections, as introduced below:

Title Page: It is designed to give readers a general overview of the theme and content of the unit.

Check up: They aim to engage students mentally to think about the topic of the reading and relate it to their lives. A preliminary focus on important vocabulary items is also intended.

Reading Passages: Texts from a variety of authentic and credible sources are accompanied by glosses and technical notes.

Digest What You Read: These parts assess the readers' comprehension of the texts through a broad range of comprehension questions and tasks.

Reading Strategy: A reading strategy that is helpful in academic contexts is introduced in each unit. It matches with the nature of the relevant reading passage.

Vocabulary Shot: Different aspects of word knowledge are taken into account through both explicit instruction and task-based activities.

Grammar Injection: Grammar is mostly treated through a discovery approach. The grammar point in each unit is taken from the related reading passage.

Translation: This section is designed as a reading practice as well as a translation activity. It also offers focused activity on vocabulary, grammar, and some features of genres presented in the unit.

Self-check: To give the learners a sense of achievement, each unit ends up with a self-check part in which the main objectives of the unit are worded explicitly.
